About Us

We are one of the leading Profile Sheet Manufacturers from the eastern part of India. With the philosophy of quality and commitment of timely delivery, we provide tailor - made roofing and cladding solutions under one roof. Our team of experts understands the need of customers and offers customized services accordingly. We offer PPGI & PPGL roofing sheets to our esteemed clients. To fulfill our quality commitment, we source the base material from industry pioneers.

Paint Coating

With the proven quality substrate material Shinemax provides roofing shades lasting for life long. With Al/Zn coating, it has chromating (pre-treatment), primer and top coat, on the top & bottom surfaces to provide a aesthetically beautiful look and a superior quality to give a longer life to the product. Advanced technology of coating on substrate material allows Shinemax to resist cracking and peeling in heavy forming operations.

Color Profile Sheets

Advanced technology of aluminum and zinc with premium ultra-advanced color coating ensures the best product which gives you a perfect combination of beauty and strength. A promise of safety for your home and factories!

Thickness Range: 0.30 mm to 0.80 mm

Quality: ALZN / ZN
(70 Gsm) / (120 Gms)

Tensile Strength: Upto 650* MPa

Color Corrugated Sheets

Traditional zinc coating along with advanced color roofing coating technology makes your homes and factories look attractive! A durable product with affordable rates!

Thickness Range: 0.18 mm to 0.80 mm

Quality: ALZN / ZN
(70 Gsm) / (120 Gms)

Tensile Strength: Upto 650* MPa

Why We Are Different From Others!

Strong

Shinemax Color Coated Profile sheets come with superior technology and have higher tensile strength, for performing under adverse conditions Shinemax sheets are lightweight and convent for easy installation with minimum expenditure on supporting structure.

Aesthetically Appealing

Multi-layered coating provides better protection against corrosion and also gives great heat insulation. Shinemax coatings are designed to be crack / peel resistant.

Durable

The protective layers of zinc and paint make the sheets weatherproof while the anti-rust technology provides longer life.

Boundary Wall & Barricades

- Construction Sites • Hotels
- Resorts • Factories

Cladding

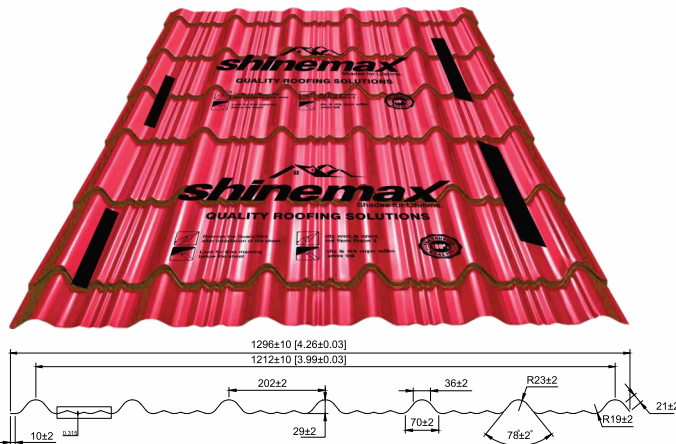

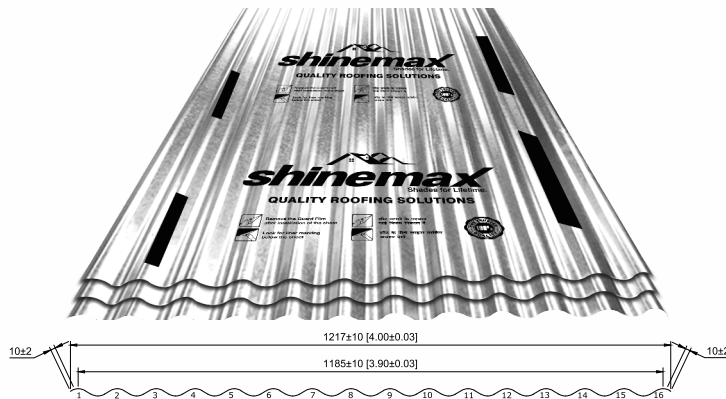

- Warehouses • Cold Storage
- Airport Hangars • Industrial Sheds

Roofing

- Houses • Animal Shelters
